

Overview

Whiteboard

Problem Statement: What are the key challenges inhibiting edge computing adoption?

Process:

- Day 1: Ideation
- Overnight: Grouping
- Day 2 Opening: Multi-voting
- Day 2: Solution Ideas

Guidance:

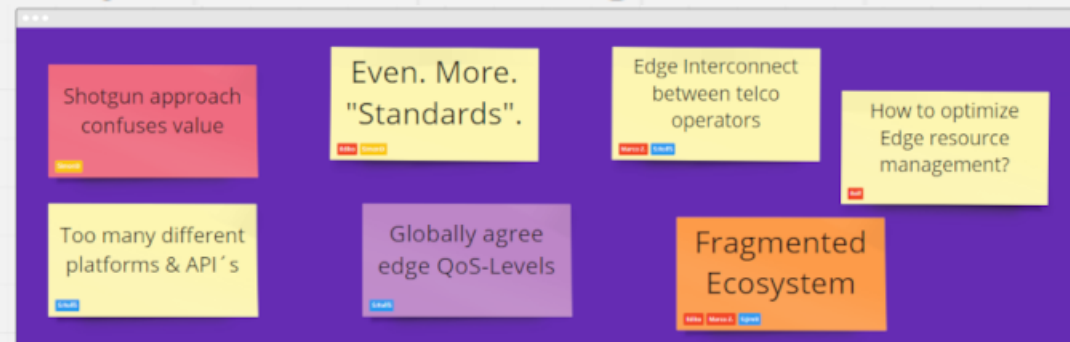

- Prefer solutions with some OEC action possible
- Don't worry too much about the colors
- Select a sticky and tag with your name () when you vote

Palette

Solution Idea

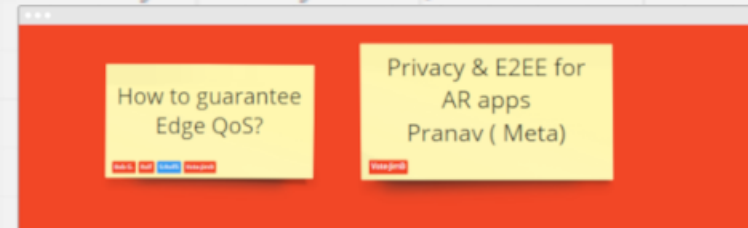

Ecosystem and Infrastructure Fragmentation

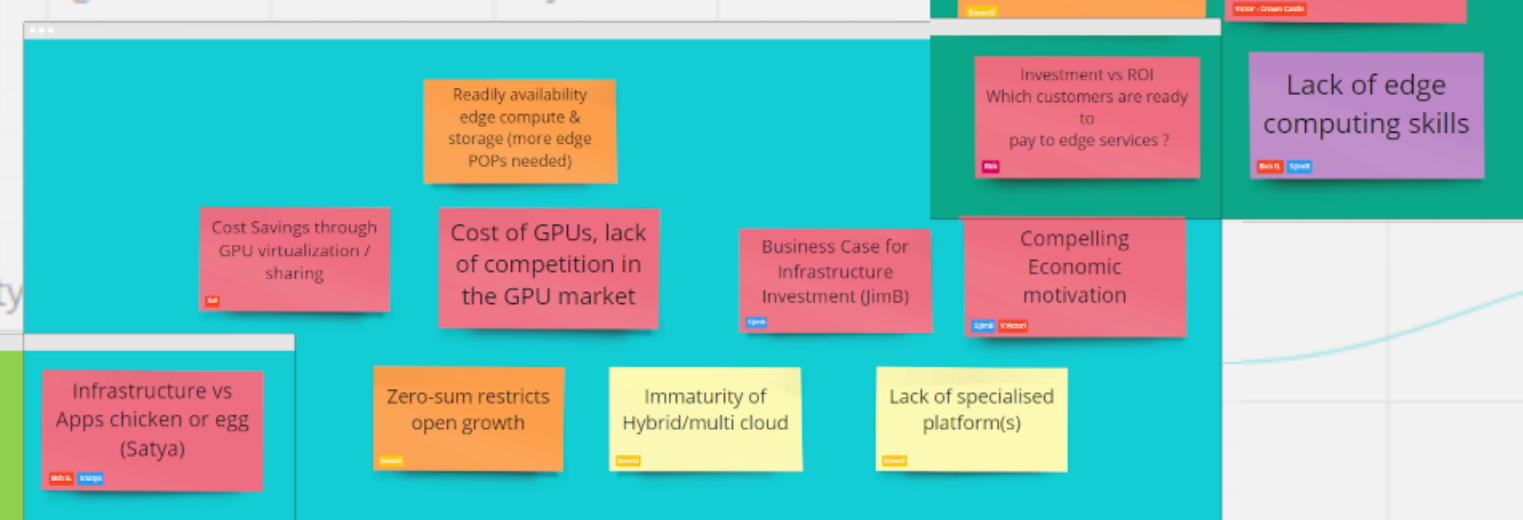

Format of the AR content being served for more dynamism and high fidelity - GLTF / meshes / etc ?
Pranav (meta)

High LTE Latency

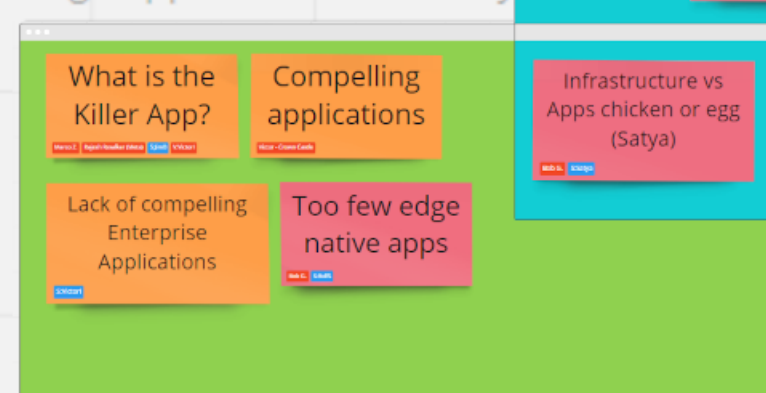

Privacy, Security and QoS

Edge Infrastructure Availability and Business Case

Edge Application Availability

Solution Space (For Day 2)

Fragmentation Solution Ideas

Drive edge platform API convergence

Privacy, Security and QoS Solution Ideas

OEC develops an E2E data privacy framework

Management and optimization of edge QoS

End User Awareness Solution Ideas

OEC works with members to create and promote solution blueprints

Edge Infrastructure Availability Solution Ideas

Develop and benchmark GPU Sharing

Develop and optimize use-case specific edge resource management

Edge Application Solution Ideas

LEL implementation of Anbox
