

INVITATION Project Olympus "Show and Tell"

Thursday, June 7, 2007
3:30-5:30 pm

Intel Lab, 4th floor
Collaborative Innovation
Center, 4720 Forbes Ave
Carnegie Mellon

- **Project Olympus** is a new initiative designed to create and sustain **Next Generation Computing** innovation for Western Pennsylvania.
- Olympus aims to build an infrastructure and foster a climate that will **enable local talent to take root and flourish in the region—and bring to fruition projects and ideas born here.**
- Launched with an initial grant from **The Heinz Endowments**, Olympus' goals coincide with those of the Endowments' **Innovation Economy program.**

Please join us for our Inaugural "Show and Tell" highlighting Olympus' PROBEs in progress.

Lenore Blum: Overview of Olympus: What we are all about

Luis von Ahn: reCAPTCHA: Stop Spam, Read Books

Gary Miller: Medical Applications of Image Segmentation Algorithms

Matt Humphrey: Eivod: Enhancing Internet Video-On-Demand

Scott Russell: Perspectives from Silicon Valley

We look forward to much discussion and interaction.
