Where Do Good Ideas Come From?

3 Basic Stages of Video

- **PRE-PRODUCTION**

- Script/Storyboards/Budget

- **PRODUCTION**

- Location/Camera crew/ Directing

- **POST-PRODUCTION**

- Video editing/Audio Voice-over/Graphics/
Music

Real World Production

- **Concept & Development**

- Idea, story, producers, pitch, funding, commission

- **Pre-Production**

- Screenwriting, storyboards, previz, cast, crew, schedule, locations, costume, props

- **Production**

- Camera, lighting, sound, direction, talent

- **Post-Production**

- Rough cut, online edit, ADR, music, audio mix

- **Marketing & Distribution**

- Prints/copies, consumer/social media, festivals, promotion, press, broadcast, cinema

- **Monitoring & Development**

- Ratings, reviews, box office return, online web stats and sales

Strategy

Strategy

plan or method

achieve a goal or s

organizational acti

1. Know Your Audience...

2. Choose A Video Style...

3. Actually Make It..

4. Get Eyes On It...

Concept & Development

- It's all about the message!
 - *What's the takeaway...?*
 - *What do you want people to remember...?*

The Elevator Pitch

The fumbled response

A photograph of an elevator shaft with a blue speech bubble overlay. The shaft has grey textured walls and a white door. The speech bubble contains the text: "Interesting project.... What is the name of your company again?"

“Interesting project.... What is the name of your company again?”

Know Your Audience

- **Write a Creative Brief**

- **Purpose:** *What is my main core objective? Pick just one primary goal!*
- **Single Thought:** *What is my main core message? Identify the key takeaway idea or action.*
- **Who:** *Who is my primary target audience? Age? Sex? Interests? Income?*
- **Reach:** *Where might I reach this audience? YouTube? TV Ads? Facebook? Video? Video Podcasts?*
- **Call to Action:** *What is the single action you'll compel the viewer to make?*

Choose a Style that Best Fits the Idea

“A medium affects the society in which it plays a role not by the content delivered over the medium but by the characteristics of the medium itself.”

Marshall McLuhan

Promotional Video Style Elements

- **Tone:**
 - *Lighthearted or Serious?*
- **People & Speech:**
 - *'Talking Head' Interview style or Professional Actor?*
- **Production Quality:**
 - *Highly Polished Studio or Shot On-Location?*
- **Scripted or Unscripted:**
 - *Candid Q&A or Scripted and rehearsed questions?*
- **Video Quality:**
 - *Called production quality– do you want the video to look like simple online video, or big-budget?*

Popular Promotional Video Genres:

The genre of the video sets the tone and subliminal message about your idea, offering and brand.

- **Narrated Video:**

- *A female or male narrator's voice talks over the video, informing and educating.*

- **Testimonial Videos:**

- *Interviews with people about their needs and how their expectations were met.*

- **Company Spokesperson:**

- *Have your spokesperson do a 'talking head' video where they speak to the camera about the product/service.*

- **Professional Actors:**

- *Actors 'play out' scenarios, or talk to the camera about the benefits.*

- **Explainer Videos:**

- *Combination of narration along with very simple animations to explain a message.*

Style + *Image* = **Representation**

- The choices you make will say a lot about the video's message and brand.
- Choosing the right mix of elements is important for your video so that the viewer doesn't get mixed messages!
- Genre & style will also affect budget – the least expensive video uses no graphics... just candid interviews.

Visual & Imagery Questions:

- **Graphics:**

- *Will it be heavy on graphics and animation, and if so how will this affect your budget?*

- **Music:**

- *Royalty Free Background Music, or no music at all?*

- **Imagery:**

- *Animated custom graphics, or simple photo graphics?*
- *Several websites offer basic templates for building animations and info-graphic presentations cheaply. (Resources page later)*

**What best fits the projects personality!
What best tells your story!**

Pre-Production

Write the Script

- How many times have you pitched and/or explained your project to others?
- Start with that basic pitch idea and write the script.
 - *Read it out loud to yourself.*
 - *Read it out loud to others.*
 - *Fine tune it further.*
 - *Then fine tune even further.*

Script

- **Keep it Succinct**

- *Give them a tasty appetizer not a website worth of information. 1 – 2 minutes, 3 minutes max*

- **Make Someone's Life Better**

- *Your product/idea exists because your making someone's life better.*
- *Just like in movies, novels, video games the role of the antagonist is critical to your story*

- **What's In It For Me factor**

- *Tell people what you can do for them not just what you can do... articulate the end benefits!*

- **Humor Your Audience**

- *Humor makes ideas more approachable and friendly.*
- *However, it needs to be well-suited to your target audience... if they don't get the joke then the jokes on you!*

- **The Power of Emotions**

- *A key driver behind decision making. Humor isn't your only creative resource.*
- *Appealing to your audience's heart through memories, nostalgia, dreams and aspirations. That "warm and fuzzy" feeling can make people more receptive to what you're communicating.*

Keep it Succinct

Make Someone's Life Better

What's the Problem? I Can Fix It!

What's In It For Me factor

Humor Your Audience

Hardee's Burgers

Luv's Diaper

Assign Roles

- **Visionary:** *The Story Teller*
- **Producer:** *The Organizer*
- **Technician:** *The Know-How*
- **Audio:** *Well Recorded & Mixed Sound*
- **Visuals:** *Camera, Graphics & Editing*

Tips From the Creative Side...

When to hire

a **pro** vs.

when to **DIY**

DIY

“DIY” Tips and Rules

- Composition
- Camera Work
- Lighting
- Sound
- Editing
- Graphics
- Music

Production

Visual Composition & Design

- **Google the rule of thirds:**
 - *Rule of thirds is a guideline which applies to the process of composing visual images.*
 - *The guideline proposes that an image should be imagined as divided into nine equal parts by two equally-spaced horizontal lines and two equally-spaced vertical lines, and that important compositional elements should be placed along these lines or their intersections*
- **Divide the screen into thirds.**
 - *Frame shots so subjects fall at the intersection of these imaginary lines.*
 - *Remember: DO NOT frame subject dead center.*

Rule Of Thirds

	DO NOT PUT YOUR SUBJECT HERE!	

Good or Bad Composition?

Get Physically Close to Subject

- Use ZOOM as little as possible:
 - *Shoot wide and physically move into subject.*
 - *This will eliminate camera shake.*
- Get physically close to on-camera talent as well:
 - *Do not shoot on-camera talent in wide shot.*
 - *Always frame for a head and shoulders shot.*

Shooting Interviews

- *Unless you're going for a dramatic effect, have the camera lens at same height as subjects eyes.*
- *If using on-cam talent either have them facing the camera directly or looking slightly off lens center.*
- *Use a tripod.*
 - *Unless you want the 'shaky cam' look, the shot needs to be locked down*

Shoot More than One Shot

- Film scenes using more than just one shot:
 - *Use multiple shots giving different perspectives to what's being viewed.*
 - *Use different angles and different shot sizes.*

Shoot Lots of B-Roll

- Spend as little OC time as possible with talent.
 - *Have them introduce the project with a short declarative statement of project.*
 - *As they continue to explain the project move to B-roll footage.*
 - *Visually show what is being described.*

Lighting

- You need light to make a decent picture.
- If you do shoot a talking head:
 - Go where there is plenty of natural light.
 - *End of hallways are great places to shoot.*
 - *Use a white bounce card for shadow side.*
- Make sure the camera is White Balanced to the type of light your shooting under:
 - *Is it daylight or tungsten?*

Titles

- Make sure the piece has a title followed by the introduction:
 - *The title sequence and introduction can be brief but it should be visually interesting.*
 - *Use DYNAMIC graphics or effects for impact.*

Sound

- How can you improve the sound from the built-in mic?
 - *Place camera as close to sound source as practical.*
 - *Face camera away from loud background noise.*
 - *Always use headphones to check sound quality.*

Music

- Music can really help with:
 - *Sustaining interest.*
 - *Conveying excitement/energy/emotion.*
 - *Choose music that best fits your visual concept.*

Music

- Be careful that music does not interfere with voice over (VO).
 - *Music works really well for openings and closes.*
 - *Don't use music the whole 2 minutes.*
 - *Bring it in and out only when it helps tell or underline the message.*

Editing

- iMovie
- Premier
- Final Cut
- Free edit software
 - *Windows Movie Maker 2012*
 - *MPEG Streamclip 1.2.1b6*
 - *Kate's Video Toolkit*
 - *Lightworks (windows)*
 - *Avidemux (Windows/Mac/Linux)*
 - *VSDC Free Video Editor*

Case Study:

Search man SEO playon Superman theme

- **How to make good-enough demo/ explainer videos for your App for \$5**
- **We just made our explainer video for SearchMan (AppStore SEO for developers) & got several inquires from customers asking us how we did it. So we decided to share...**

Don't hire Spielberg. Spend \$ wisely. 10 step how-to:

- 1. Write a script in Google Drive (160 words=1 minute)**
- 2. Hire voice-over artist on Fivver (\$5) to read script**
- 3. Import voice-over MP3 file into PowToon**
- 4. Create & synch ppt slides in PowToon**
- 5. Export the combined voice+visual MP4 to iMovie**
- 6. Add sound effects, normalize audio, etc in iMovie**
- 7. Post to YouTube**
- 8. Add Titles/Tags inspired by Google Keyword Tool**
- 9. Embed & Share link with your community**
- 10. Rinse repeat. Time cost = 3-4 hours**

“Sorry for the plug but I just launched my company and we had our video made months in advance of launch and it helped up sell an idea way before we had a MVP/Beta to show. Very effective.”

Trace Cohen, President/Co-founder of Launch.it

**Websites that offer video-presentation
templates at very low-costs.
Just add your own texts/images/voices.**
