Prior to joining Tepper, Summer worked for several global companies such as Hewlett Packard and Electronic Arts. As a software engineer and later a product manager, Summer experienced how cutting-edge technologies solve challenges in a revolutionary way and how a startup mindset accelerates business growth.

Now Summer is leading a CMU team from Tepper, Heinz, SCS and build an AI-powered digital pet LittleMoochi to help children form healthy eating habits. As a Swartz Fellow, Summer is also very proud of being a part of Swartz entrepreneurial ecosystem and especially passionate about contributing to women's entrepreneurship. In her spare time, Summer is really into fitness and bodybuilding.
